

## Relay related patents

A magnetic retention relay in October 2007 Utility model patent: 200720075320.9

Invented in April 2010, a patent for conductive contacts for industrial electrical appliances: 200810202432.5 Utility model patent: 201020155543.8

December 2009 A single-phase magnetic holding relay obtained a utility model patent: z1200920214631.8

May 2010 A single-phase magnetic holding relay obtains a utility model patent: z1201020195005.1

December 2010 Permanent magnet contactor drive circuit obtained utility model patent: z1201020642605.8

In May 2013, a sampling resistor and a magnetic holding relay obtained a utility model patent z1 2013 2 0232111.6

May 2013 Sampling resistor and magnetic holding relay obtained utility model patent z1 2013 2 0231679.6

May 2013 A sampling resistor and anti-interference magnetic retention relay obtained utility model patent z1 2013 2 0279451.4

July 2013 a relay Obtained utility model patent z1 2013 2 0394168.6

January 2014 Magnetic retention relay with flexible static contact part invention patent z1 2014 1 0013350.1 utility model patent z1 2014 2 0018776.1

April 2015 A dual-circuit magnetic holding relay utility model patent z1 2015 2 0261008.3

A heat-dissipating three-phase magnetic holding relay in May 2017 Invention patent application 201710386762.3 utility model 201720602267.7

In June 2017, a four-input and two-way magnetic holding relay that can cut off the neutral and the live line at the same time. Invention patent application 201710420236.4 utility model

201720650072.x

June 2017 A magnetic holding relay that can cut off both the neutral and the live wire at the same time. Patent application acceptance notice 201710428897.1 Utility model 201720662351.8

In June 2017, a patent application acceptance notice for magnetic retention relays that simultaneously shut down the neutral and phase line power supply circuits 201710432637.1 Utility Model 201720668232.3

In June 2017, a magnetic retention relay capable of cutting off both the neutral and the live wire. Patent application

20171044885.5 Utility model 201720691135.6

Double layer small volume double magnetic retention relay in June 2018 Utility model patent: z1201820870894.3 Invention patent:  
201810576380.1

Magnetic holding relay for three-phase unbalance adjusting device in July 2018 Invention patent 201821033203.0 Invention  
application number: 201810708060.7

September 2018 Small-volume single-pole double-throw magnetic retention relay Patent  
application number: 20181032408.1 Invention application number: 201821449117.8

July 2018 New Shaped Magnetic Retention Relay Patent application number: 201820207357.0

October 2019 Long life three-phase magnetic holding relay Patent application number: z1201920062895.x

October 2019 High reliability three-phase magnetic holding relay Patent application number::z1201910036009.0

•Dual 908 series international patent pct application authorization

RAMWAY advantage dual-channel products The world's market share has the highest share Highest shipments Have the most patents Authorize local companies to share patents in some countries

- Two-way relay genealogy
